

You've got this.

Are you in computer science or software engineering? Can you help?

Saint Mary's school is again partnering with Microsoft Philanthropies TEALS to deliver computer science courses to our students next year. TEALS recruits, mentors, and places passionate technology professionals into high school classrooms as volunteer instructors. As a TEALS partner school, Saint Mary's must assist with volunteer recruitment from the computer science and software engineering fields to team-teach these courses with our teachers. TEALS provides training for both parties, rigorous curricula, and opportunities for students to continue their education outside of the classroom. Courses are scheduled first thing in the morning to allow volunteers to get back to work.

If you or someone you know works in the computer science or software engineering field and would be interested in making a difference in our students' future success, please contact Dean of Teaching and Learning Leslie Owen at lowen@sms.edu.

More details are available [here](#). More about TEALS can be found [here](#).
